Hello, I'm Bryan Juanacio

I'm a Software Engineer with great skills in UX/UI. I have 6+ years of experience building quality software with multiples companies.

My main technologies include React, Astro, React Native, Angular, Typescript, Node.js. I also have great knowledge in Node, Express, Next js, Apollo, Figma and different design tools.

Work Experience

Full stack Developer / UX Engineer

bojuanDev
Currently

bojuanDev is my pseudonym as a freelance developer. After several years of experience, I have the necessary knowledge to create quality software with a focus on user experience.

Frontend Developer Leader

Banco Pichincha
jul 2022 - abr 2025

I coordinated the development of Banco Pichincha's Design System. I maintained, updated, and automated front-end projects using libraries. I provided support to all the bank's teams and assisted developers in their development.

Frontend Developer

Devsu
oct 2021 - jun 2022

Web project development primarily using React and Next.js. Microservice development using Typescript and AWS. I worked with the Unicorn company Kushki and its payment button.

Full stack developer

Itzam
abr 2019 - oct 2021

Development of web projects and mobile applications using React, React Native, Node.js, and Flutter. I assisted in the development of a real-time platform that included several web platforms and a mobile application.

Education

Graphic Computer Engineer
Central University of Ecuador

Master's in User Experience Design
International University of La Rioja
